## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Bjelland et al U.S. Patent Number 6,856,612.

Re Claims 1, 6, fig. 7 teaches a GW 770 coupled to GSM wireless circuit network (first network based on a first technology) and PSTN (a second network based on a second technology, See fig. 4) whereby the GW 770 enables TFO inband capability negotiation on the circuit switched leg with an negotiation clone over the IP leg to enable end-to-end transcoding (in order to establish the format for the passing) of the multimedia information (See col. 6, lines 25-66).

Re Claims 2, 3, 7, refer to Claim 1.

Re Claims 4, 8, refer to Claim 1, wherein the further teaches the destination GW 780 coupled to another GSM network (a third network based on first technology) for passing of the TFO message, wherein the GW 780 inherently includes an interface (interface means).

Re Claims 5, 11, refer to Claim 1, wherein the TFO message negotiates codec information (compressed audio stream).

Re Claim 9, refer to Claim 6, wherein GSM is an PLMN.

Re Claim 10, refer to Claim 6, wherein IP backbones supports plurality of service providers (a plurality of telecommunication networks).

Re Claim 12, refer to Claim 6, wherein the first network is a multimedia network.

Re Claim 13, refer to Claim 6, See fig. 4 teaches the GSM wireless network coupled to the PSTN 180 (the second network) that supports SS7 based network.

Re Claims 14, 22, 23, fig. 5 teaches H.323/SIP mobile 340 (a first node) in a GSM network 300 (a first multimedia network) and PC telephone 350 (a second node) in PSTN (a second multimedia network) wherein the networks are separated by an IP backbone 320 (telecommunication transit network) wherein the ISP POP includes GW router interface receives TFO inband capability negotiation message (a control message) from 300 and perform mapping of the message to the transmitted over the IP leg 320 to enable end-to-end transcoding (in order to establish the format for the passing) of the multimedia information (See col. 6, lines 25-66).

Re Claim 15, refer to Claim 14, the IP backbone supports SS7.

Art Unit: 2663

Re Claim 16, refer to Claim 14, wherein the IP backbone is not tied to underlying user plane transport.

Re Claims 17-19, refer to Claim 15, fig. 5 supports GSM TFO inband signaling. Re Claims 20, 21, refer to Claim 14.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 571-272-3130. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ricky Ngo can be reached on 571-272-3139. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
